

REINFORCE
REsearch INfrastructures FOR Citizens in Europe

Sonification Training Courses

 **22.06.22**

 **European Gravitational Observatory Cascina (Pisa)**

 **19.00-21.00 (June 22)**

10.00-12.00 (June 23-24)

REINFORCE Training courses using sonification, will take place from June 22 to June 24 at the European Gravitational Observatory (EGO). The courses will focus on "Life and Death of Stars" and will be targeted to visually impaired citizen scientists.

During the training courses, citizen scientists will learn, using a series of sonification tools, about the life and death of stars. They will learn what stars leave behind after their deaths, the emergence of gravitational waves from different systems, and the properties of dynamical space time.

To help citizen scientists to acquire skills and learn how to listen and interpret "sounds" the number of attendees is limited to 15. Early registration is therefore warmly recommended.

A shuttle service will be agreed for registered attendees travelling from Pisa to the European Gravitational Observatory and back.

A certificate of attendance will be released at the end of the courses.

The REINFORCE project has received funding from the European Union's Horizon 2020 project call H2020-SwafS-2018-2020 funded project Grant Agreement no. 872859
